Pflugerville, TX 78660

Jane Henney, M.D.

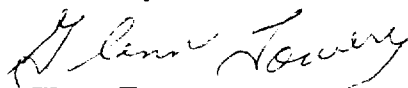

My Urologist has been taking Saw Palmetto and Psyllium for serveral years, and is telling those interested in herbals as a substitute, which has no side effects, about it.

I am a strong believer in this product for benign prostatic hyperplasia.

I believe it is time for the F.D.A. to give the public what they want.

Some more are Folic Acid, which doctors give to mothers to be, and vitamin B6, B12, Vitamin E also, for cardiovascular disease.

Sincerely,

  
Glenn Towery
